Admin. Assistant

Raising Manholes

This past week the Water Distribution / Sewer Collection crew was busy raising manholes on the two parallel trunk lines that run to the Water Reclamation Facility. These manholes lie within a flood plane and have, on occasion, been covered with water during heavy rains. Raising the manholes will help prevent infiltration of storm water into the sanitary sewer system during heavy rain events, as happened earlier this year.

So far they have taken care of six of the manholes and hope to be able to complete the remaining manholes within the next couple of weeks.
